AGRICULTURE & GARDEN & GREEN HOUSE FLAG DRIPPERS

FLAG DRIPPER

Flag Drip Emitters

DIG's FN Flag Drip Emitters have a unique style with a side barbed outlet extension for extending 1/4" micro tubing to the plant area. They are available in flow rates of 1, 2 and 4 GPH and operate at 10 to 25 PSI with the flow rate depending on the incoming inlet pressure. The nominal pressure for the flag drip emitters is 15 PSI. With higher pressure, the drip emitters will release more flow, and with lower pressure, less flow. They are available in packs of 5, 25 and 100, all with a 1/4" self-tapping barbed inlet and 1/4" small barbed outlet. The emitters have a take-apart two-piece construction, so that the top insert can be twisted and pulled apart for easy cleaning. Use these emitters in small systems with short run plantings, on flat terrain and with low pressure gravity feed systems.

Features

- Available in three colors so that it is easy to identify flow rate
- Self-tapping barbed inlet for easy installation
- Outlet barb for use with 1/4" micro tubing
- Spiral flow through a large-flow-path water passage reduces likelihood of clogging
- Twist-open top with lock for secure operation under pressure and for easy cleaning
- Durable high-impact plastic
- Resistant to chemicals and fertilizers used in landscape application
- Constructed of UV-resistant, durable plastic material to withstand the most adverse conditions
